## Frenchic Chalk Wall Paint

Luxurious and practical, Frenchic Chalk Wall Paint is a washable, ultra matte chalk wall paint with very little odour. With superior coverage, this revolutionary product will enhance any room it happens to grace. Applied in only 1-2 coats, it is breathable and durable yet still maintains all the beautiful and unique qualities you would expect from Frenchic. As with all of our other products, it is EN 71:3\* certified and is ideal for painting nurseries and children's rooms.

## Frenchic Trim Paint

An elegant, subtle satin paint designed to enhance skirting, coving or any woodwork while at the same time providing an extremely high scuff resistance and a robust finish. Our paint can be used directly onto wood (bare or painted), brick, stone, plaster or any suitably primed rigid surface. No priming or sanding necessary on most surfaces. Complying with EN71:3\* means that it is safe to use on children's toys.
